ARTICLES

Céline Van Themsche, Michèle Jacob, and Christian Salesse Human retinal pigment epithelium secretes a phospholipase A2 and contains two novel intracellular phospholipases A2 1

Bradley J. Thatcher and Kenneth B. Storey Glutamate dehydrogenase from liver of euthermic and hibernating Richardson's ground squirrels: Evidence for two distinct enzyme forms 11

Richard Hemming, Ronald Agatep, Ketan Badiani, Kerrie Wyant, Gilbert Arthur, R. Daniel Gietz, and Barbara Triggs-Raine Human growth factor receptor bound 14 binds the activated insulin receptor and alters the insulin-stimulated tyrosine phosphorylation levels of multiple proteins 21

Prem Kumarathasan, Renaud Vincent, Patrick Goegan, Marc Potvin, and Josée Guénette Hydroxyl radical adduct of 5-aminosalicylic acid: A potential marker of ozone-induced oxidative stress 33

Ann M. Butler, Andrea L. Aiton, and Alden H. Warner Characterization of a novel heterodimeric cathepsin L-like protease and cDNA encoding the catalytic subunit of the protease in embryos of *Artemia franciscana* 43

Vijaya B. Kumar, Kamlesh Vyas, Mark Franko, Veena Choudhary, Chakradhar Buddhiraju, Jose Alvarez, and John E. Morley Molecular cloning, expression, and regulation of hippocampal amyloid precursor protein of senescence accelerated mouse (SAMP8) 57

Daniel Voskas, Rene Mader, Janet Lee, and Robert A.R. Hurta Tumour promoter mediated altered expression and regulation of ornithine decarboxylase and S-adenosylmethionine decarboxylase in H-ras-transformed fibrosarcoma cell lines 69

Jonathan C. Parrish, J. Guy Guillemette, and Carmichael J.A. Wallace A tale of two charges: Distinct roles for an acidic and a basic amino acid in the structure and function of cytochrome *c* 83

Corinne Lionne, Folma Buss, Tony Hodge, Gudrun Ihrke, and John Kendrick-Jones Localization of myosin Va is dependent on the cytoskeletal organization in the cell 93

NOTE

Olivier Chavand, Katrina Spilsbury, and Piroska E. Rakoczy Addition of a c-myc epitope tag within the VEGF protein does not affect in vitro biological activity 107

ARTICLES

Maria Luiza S. Mello, Maria Cristina H. Tavares, Marly M. Dantas, Vera Lúcia C.C. Rodrigues, Sílvya S. Maria-Engler, Silvana P. Campos, and Nancy L. Garcia Cell death and survival alterations in Malpighian tubules of *Triatoma infestans* following heat shock 709

Ralf Schindler, Elke Weichselsdorfer, Oliver Wagner, and Jürgen Bereiter-Hahn Aldolase-localization in cultured cells: Cell-type and substrate-specific regulation of cytoskeletal associations 719

Xiaoming Yang and Edward E. Ishiguro Dimerization of the RelA protein of *Escherichia coli* 729

Xin-Li Zhu, Bernhard Ganss, Harvey A. Goldberg, and Jaro Sodek Synthesis and processing of bone sialoproteins during de novo bone formation in vitro 737

Dong-dong Xu, De-pei Liu, Xin-jun Ji, Xiang Lv, and Chih-chuan Liang In vivo DNA–protein interactions at hypersensitive site 3.5 of the human β-globin locus control region 747

Robert Farkaš and Gabriela Šut'áková Swelling of mitochondria induced by juvenile hormone in larval salivary glands of *Drosophila melanogaster* 755

Yong-Doo Park, Yi Yang, Qing-Xi Chen, Hai-Ning Lin, Qiang Liu, and Hai-Meng Zhou Kinetics of complexing activation by the magnesium ion on green crab (*Scylla serrata*) alkaline phosphatase 765

Kiyotaka Tokuraku, Shinya Okamoto, Miho Katsuki, Hiroyuki Nakagawa, and Susumu Kotani The actin-depolymerizing factor destrin has an actin-stabilizing domain 773

NOTES

Gregory Harder and Ross McGowan Isolation and characterization of the muscle-specific isoform of creatine kinase from the zebrafish, *Danio rerio* 779

Eleonora Altman, Blair A. Harrison, Roger K. Latta, Kok K. Lee, John F. Kelly, and Pierre Thibault Galectin-3-mediated adherence of *Proteus mirabilis* to Madin–Darby canine kidney cells **783**
